ARM REST FASTENERS

ARM REST SCREW & BARREL NUT

Many late model GM cars have problems keeping the arm rests secure on the door. The factory uses a 1/4 x 1-1/2" Binding Head Screw to hold the arm rest in place. The screws are driven directly into the panel without a holding nut. As the door is repeatedly opened and closed, the vibration and pulling causes the screws to strip out and the arm rest loosens and may fall off.

Drive the Barrel Speed Nut into the hole. Use a 10 x 1-1/2" Binding Head Screw - #12861 (Phillips Head) as the new Arm Rest Retaining Screw.

<p><u>BARREL SPEED NUT</u> 16047</p>  <p><u>BINDING SCREW HEAD</u> 12861</p> 	<p><u>DOOR & QUARTER ARMREST SCREWS</u> 13791</p> <ul style="list-style-type: none"> • Unichrome plated No. 14 x 1 3/4"  <p>No. 14 x 2 1/4" 9451</p>
